

### Phylum

- Ascomycota
- Basidiomycota
- Blastocladiomycota
- Chytridiomycota
- Cryptomycota
- Entomophthoromycotina
- Glomeromycota
- Mucoromycota
- This study
- unclassified Fungi
- Zoopagomycota

### Class

- |                              |                         |
|------------------------------|-------------------------|
| Agaricomycetes               | Moniliellomycetes       |
| Archaeorhizomycetes          | Mucoromycetes           |
| Atractiellomycetes           | Neocallimastigomycetes  |
| Basidiobolomycetes           | Novakomyces             |
| Blastocladiomycetes          | Pichiomyces             |
| Chytridiomycetes             | Pucciniomycetes         |
| Cystobasidiomycetes          | Quasiramulariales       |
| Dipodascomycetes             | Rozella                 |
| Dothideomycetes              | Saccharomycetes         |
| Entomophthoromycetes         | Schizosaccharomycetes   |
| Eurotiomycetes               | Sordariomycetes         |
| Exobasidiomycetes            | Taphrinomycetes         |
| Glomeromycetes               | This study              |
| Glomeromycota                | Tremellomycetes         |
| Harpellomycetes              | Tritirachiomycetes      |
| Kickxellomycetes             | Umbelopsidomycetes      |
| Kickxellomycotinaincertaedis | unclassified Ascomycota |
| Leotiomycetes                | unclassified Fungi      |
| Microbotryomycetes           | Ustilaginomycetes       |
